TITANIUM WINDOW TINT

the ultimate protection under the sun

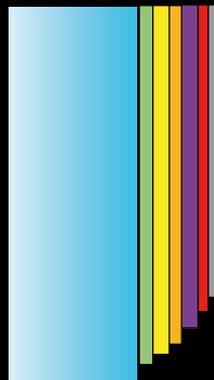

Having automotive window film on your vehicle in today's world is an essential consideration. Climate change issues also strongly support the need for us to be conscious of saving energy and giving ourselves and our family maximum protection from the sun's damaging UV rays.

MotorOne's Titanium Window Tint offers some of the best protection money can buy, dramatically reducing heat, and glare, and helping to keep the driver more alert for safer driving.

- Cuts out almost 99% of damaging ultra violet rays.
- Reflects up to 60% heat, lowers cabin temperature, reduces the load on your air conditioner and helps save fuel
- Helps hold shattered glass together in the unfortunate event of an accident
- Offers maximum privacy, offering security for items left in the car
- Patented scratch-resistant coating helps extend the life of the film with good looks that will last and last.
- Lifetime Warranty
